

AVISCERA BIOSCIENCE

Anti Human FGF-23 C Terminal Fragment Monoclonal Antibody Biotinylated

Product Information

Code	A00147-06-50B
Name	Anti FGF-23 C Terminal Fragment (Human) MAB Biotinylated
Clone No.	1A7D3
Lot No.	
Size	50 µg
Species	Human
Host	Mouse
Immunogen	Human FGF-23 (S180-I251) rec.
Ab Type	IgG
Purification	Protein G Lyophilized
Formulation	Form without preservatives
Carry	Free
Storage	-20 ° C
Specificity	Human
Reconstitution	100 µl
Application	ELISA

Preparation

This antibody was produced from an hybridoma resulting from the fusion of a mouse myeloma with B cells obtained from a mouse immunized with purified, E. coli-derived, recombinant human FGF-23 C Terminal fragment (Ser180-Ile251). That antibody was purified by Protein G affinity and conjugated with water soluble biotin.

Formulation

50 µg of Anti Human FGF-23 Monoclonal Antibody biotinylated in 100 µl of PBS lyophilized form.

Reconstitution and Storage

Add 100 µl deionized water to the vial to prepare a antibody stocking solution (500µg/ml). Stores it at 4°C for a few days. For long term storage, the reconstituted antibody can also be aliquotted (by 10 µL per vial) and stored frozen at -20° C to -70° C **in a manual defrost freezer** for 12 months without detectable loss of activity. **Avoid repeated freeze-thaw cycles.**

Specificity

This antibody has been selected for its ability to recognize recombinant human FGF-23 C-Terminal Fragment on indirect ELISAs.

Applications

Indirect ELISA Assay - This antibody can be used at 0.25-0.125 µg/ml to detect recombinant human FGF-23 C Terminal Fragment on indirect ELISA.

Optimal dilutions should be determined by each laboratory for each application.

THIS PRODUCT IS FOR RESEARCH ONLY. NOT FOR USE IN HUMANS.
