

AVISCERA BIOSCIENCE

Anti-Human Adiponutrin Monoclonal Antibody

Product Information

Code	A00067-06-100
Name	Human Adiponutrin Mab
Clone No.	2B1D2
Lot No.	
Size	100 µg
Species	Human
Host	mouse
Immunogen	Adiponutrin, full length form (H), rec.
Ab Type	IgG
Purification	Protein A
Formulation	lyophilized Form without preservatives free
Storage	-20 ° C
Specificity	Human
Reconstitution	PBS, 100 µl
Application	IHC ELISA

Preparation

This antibody was produced from a hybridoma resulting from the fusion of a mouse myeloma with B cells obtained from a mouse immunized with purified, *E. coli*-derived, recombinant human adiponutrin. The IgG fraction of mice ascites fluid was purified by Protein A affinity chromatography.

Formulation

Lyophilized 100 µg of IgG in phosphate-buffered saline (PBS).

Reconstitution

Reconstitute with sterile PBS. If 500 µl of PBS is used, the antibody concentration will be 200 µg/mL.

Storage

This antibody can also be aliquotted (by 10 µl per vial) and stored frozen at -20° C to -70° C in a **manual defrost freezer** for six months without detectable loss of activity. **Avoid repeated freeze-thaw cycles.**

Specificity

This antibody has been selected for its ability to recognize human adiponutrin in direct ELISAs and western blots as well as immunohistochemistry.

Applications

Direct ELISA - This antibody can be used at 1: 4000 (0.25 µg/ml) with the appropriate secondary reagents to detect recombinant human adiponutrin.

Immunohistochemistry-That Antibody can be used at 1: 500 [2 µg/mL] with the appropriate secondary antibody to detect adiponutrin in human visceral adipose tissues (ABC).
