Preparation

This antibody was produced from a rabbit immunized with purified, *E. coli*-derived, recombinant mouse CTRP10 globular form. That was purified by Protein A affinity.

Formulation

100 µg of rabbit anti-mouse CTRP10 IgG in PBS without preservatives was lyophilized.

Reconstitution

Add 100 µl of PBS to the vial to prepare antibody stock solution at 100 µg/100 µl.

Store reconstituted antibody at 2 to 8 ° C for up a few weeks. This antibody can also be aliquotted (by 10 µL per vial) and stored frozen at -20° C to -70° C **in a manual defrost freezer** for up six months without detectable loss of activity.

Storage

Lyophilized antibody can be stored at 2 ~8 ° C for a few weeks or at -20 ° C for six months.

Avoid repeated freeze-thaw cycles.

Specificity

This antibody has been selected for its ability to recognize soluble mouse CTRP10 in direct ELISA and immunohistochemistry.

Applications

Indirect ELISA - This antibody can be used at 1:8000 (0.125µg/ml) with the appropriate secondary reagents to detect mouse CTRP10.

Immunohistochemistry-That Antibody can be used at 2-4 µg/ml with the appropriate secondary antibody to detect CTRP10 in the paraffin embedded mouse brain tissues (ABC).

Optimal dilutions should be determined by each laboratory for each application.
