Preparation

This antibody was produced from a rabbit immunized with purified recombinant humanCTRP12, Globular Form. That was purified by Protein A affinity.

Formulation

100 µg of rabbit anti-human CTRP12 IgG in 100 µl of PBS without preservatives in lyophilized form.

Reconstitution

Add 100 µl of PBS to the vial to prepare antibody stock solution at 100 µg/100 µl. Store reconstituted antibody at 2 to 8 ° C for up a few weeks. This antibody can also be aliquotted (by 10 µL per vial) and stored frozen at -20° C to -70° C **in a manual defrost freezer** for up six months without detectable loss of activity.

Storage

This lyophilized antibody can be stored at 4 ° C for a few weeks. It can be stored frozen at -20° C to -70° C **in a manual defrost freezer** for up six months without detectable loss of activity.

Specificity

This antibody has been selected for its ability to recognize human CTRP12 on indirect ELISA and immunohistochemistry.

Applications

Indirect ELISA - This antibody can be used at 0.25 µg /mL with the appropriate secondary reagents to detect recombinant human CTRP12.

Immunohistochemistry-That Antibody can be used at 2-4 µg/ml with the appropriate secondary antibody to detect CTRP12 in human paraffin embedded visceral adipose tissues (ABC).

Optimal dilutions should be determined by each laboratory for each application.
