Rabbit Anti Myonectin/CTRP15 (Mouse) IgG

Product Information

| | |
|----------------|-------------------------------|
| Code | A003938-03-100 |
| Name | Rabbit Anti CTRP15 (M) IgG |
| Clone No. | Polyclonal |
| Lot No. | |
| Size | 100 µg |
| Species | Mouse |
| Host | Rabbit |
| Immunogen | Mouse CTRP15 |
| Ab Type | IgG |
| Purification | Protein A Lyophilized |
| Formulation | Form without Preservatives |
| Carry | Free |
| Storage | -20 ° C |
| Specificity | Mouse, rat |
| Reconstitution | PBS, 100 µl |
| Application | IHC ELISA |

PREPARATION

This antibody was produced from a rabbit immunized with purified recombinant mouse Myonectin/CTRP15 globular form. That IgG was purified by Protein A affinity

FORMULATION

100 µg of Rabbit Anti Myonectin/CTRP15 (Mouse) purified IgG in 100 µl of PBS without preservatives was lyophilized.

RECONSTITUTION

Add 100 µl of PBS to the vial to prepare antibody stock solution at 100 µg/100 µl. Store reconstituted antibody at 2 to 8 ° C for up a few weeks. This antibody can also be aliquotted (by 10 µL per vial) and stored frozen at -20° C to -70° C **in a manual defrost freezer** for up six months without detectable loss of activity.

STORAGE

Lyophilized antibody can be stored at 2 ~8 ° C for a few weeks or at -20 ~ -70 ° C for 12 months. **Avoid repeated freeze-thaw cycles.**

SPECIFICITY

This antibody has been selected for its ability to recognize mouse Myonectin on indirect ELISAS , Western Blot and immunohistochemistry.

APPLICATIONS

Indirect ELISA - This antibody can be used at 0.125 µg/ml to detect recombinant mouse myonectin globular form on indirect ELISA.

Western blot - This antibody can be used at 2~4 µg/mL to detect recombinant mouse Myonectin globular form under reduce condition.

Immunohistochemistry- That antibody can be used at 2~4 µg/ml to detect myonectin in the paraffin embedded mouse or rat visceral adipo and heart tissue slides.

Optimal dilutions should be determined by each laboratory for each application.
