

AVISCERA BIOSCIENCE

Rabbit Anti-Human CTRP-9 IgG Biotinylated

Product Information

Code	A00081-04-100
Name	Anti Human CTRP9 IgG Biotinylated
Clone No.	N/A
Lot No.	
Size	50 µg
Species	Human
Host	Rabbit
Immunogen	CTRP-9 (H) mature form rec.
Ab Type	IgG
Purification	Protein A
Formulation	lyophilized Form without preservatives free
Carry	
Storage	-20 ° C
Specificity	Human
Reconstitution	PBS, 100 µl
Application	IHC ELISA

Preparation

This antibody was produced from a rabbit immunized with purified, *E. coli*-derived, recombinant mature form of Human CTRP-9. That IgG was purified by Protein A affinity and conjugated with water soluble biotin.

Formulation

50 µg of Anti CTRP9 (Human) IgG Biotinylated in PBS without preservatives was lyophilized.

Reconstitution

Add 50 µl of PBS to the vial to prepare antibody stock solution at 100 µg/100 µl. Store reconstituted antibody at 2 to 8 ° C for up a few weeks. This antibody can also be aliquotted (by 10 µL per vial) and stored frozen at -20° C to -70° C in a **manual defrost freezer** for up six months without detectable loss of activity.

Storage

Lyophilized antibody can be stored at 2 ~8 ° C for a few weeks or at -20 ° C for six months. **Avoid repeated freeze-thaw cycles.**

Specificity

This antibody has been selected for its ability to recognize mature form human CTRP-9 on indirect ELISA as well as immunohistochemistry.

Applications

Indirect ELISA - This antibody can be used at 0.125 µg /mL with the appropriate secondary reagents to detect human CTRP-9 mature form on indirect ELISA.

Immunohistochemistry-That Antibody can be used at 2.5-5 µg /mL with the appropriate secondary antibody to detect CTRP-9 in paraffin embedded human adipose tissues (ABC).

Optimal dilutions should be determined by each laboratory for each application.

THIS PRODUCT IS FOR RESEARCH ONLY. NOT FOR USE IN HUMANS.
