Preparation

This antibody was produced from a hybridoma resulting from the fusion of a mouse myeloma with B cells obtained from a mouse immunized with purified, E. coli-derived, recombinant human Epigen, Extracellular form, His Tag on N-Terminus. That antibody was purified by Protein G affinity.

Formulation

100 µg of Anti Human Soluble Epigen monoclonal antibody in 100 µl of PBS lyophilized form.

Reconstitution and Storage

Add 100 µl deionized water to the vial to prepare a antibody stocking solution (100µg/ml). Stores it at 4°C for a few days. For long term storage, the reconstituted antibody can also be aliquotted (by 10 µL per vial) and stored frozen at -20° C to -70° C **in a manual defrost freezer** for 12 months without detectable loss of activity.

Avoid repeated freeze-thaw cycles.

Specificity

This antibody has been selected for its ability to recognize recombinant human Soluble Epigen in indirect ELISA.

Applications

Indirect ELISA - This antibody can be used at 1:8000 (0.125 µg/ml) to detect human Soluble Epigen on indirectly ELISA.

Optimal dilutions should be determined by each laboratory for each application.
